

Jewish Federation of Broward County Community Security Program

The Jewish Federation of Broward County is proud to provide a Community Security Program designed to increase the safety and security of Jewish life in Broward County. This program is the heart of our Federation's security efforts, focusing on proactive risk management, guidance, and education led by our Community Security Director, Dennis May.

Partnership with Secure Community Network (SCN):

- **Threat and Vulnerability Risk Assessments:** Evaluations to identify potential security vulnerabilities while providing a roadmap for mitigating the identified security gaps.
- **Training Courses:** Community training sessions to empower your organization with the best practices in security and emergency response. Please visit www.bit.ly/SCNTraining to view a list of available courses.
- **Incident Reporting Platform:** A streamlined process for reporting security incidents, ensuring timely and effective dissemination to the appropriate entity for resolution.
- **Tabletop Exercises:** Interactive sessions to simulate potential scenarios and refine response strategies, enhancing your preparedness for real-life situations.
- **Regional Intelligence Threat Center:** Embedded intelligence analysts leveraging advanced AI-driven technology to monitor real-time threats to our community.

Nonprofit Security Grant Program (NSGP) Support:

Navigating the FEMA Nonprofit Security Grant Program (NSGP) can be complex and challenging, but we are here to assist. We provide support in the following ways:

- **Grant Specialist:** A dedicated professional will be available to guide you through the stages of the grant process. This pilot program is designed to support you in the grant writing phase, as well as in managing your grant progress post-approval.
- **Application assistance:** We can provide risk assessments for your property, as well as additional resources for the grant application process, helping you align with grant requirements.
- **Qualified Vendor List:** Access to a curated list of vendors to streamline your procurement process.

Free Equipment Available:

To bolster our physical security measures, we are now able to loan key pieces of equipment to our agencies for a temporary period at no cost. These items include:

- **Weapon Detectors:** To enhance our ability to deter, detect, and address potential threats at high-capacity events.
- **Barricades and Cones:** For effective crowd and vehicle control at our community facilities.
- **Stop the Bleed Kits:** Publicly accessible bleeding control products allowing persons to treat injured parties before the arrival of definitive health care.
